# SolarSpeed Avantis

## the innovation with XXL impact

SolarSpeed Avantis is a revolutionary breakthrough in solar panel mounting that allows us to:

~ **Optimise costs:** less assembly time and fewer necessary parts mean direct cost savings.

~ **Offer endless possibilities:** our system is compatible with all types of panels, whatever their size. It also requires less ballast than competing brands.

~ **Make maintenance easier:** the aisles between the panels are at the top, offering easy access to wiring and any areas in need of maintenance.

~ **Increase efficiency:** we supply our assembly frames with pre-assembled parts.

~ **Achieve shorter installation times:** the innovative slide system requires a minimum number of screws, making installation faster.

**Want to complete your projects faster?**

### Choose SolarSpeed Avantis!

SolarSpeed Avantis is unique because of its cutting-edge technology that allows for very fast assembly. Our system is quicker to put together than others, leading to faster project completion. It is designed to be user-friendly and ergonomic, reducing physical effort during installation.

### Soon to experience all the benefits yourself?
